The High-Performance AGM Solution for Trolling Motors, Cranking, and Marine Electronics

Power That Keeps You Fishing

- ✓ Stop cutting your fishing trips short because of power fade. VMAX Marine AGM batteries are engineered for the boater who demands more.
- ✓ More runtime, more reliability, and zero maintenance.

Consistent Power Under Extreme Conditions

- ✓ Unlike standard batteries that fail under the stress of pounding waves and heavy electrical loads, VMAXTANKS utilize heavy-duty internals for superior vibration resistance and deep cycle endurance.
- ✓ Whether you are powering a 36V trolling motor system, running multiple fish finders, or keeping the live well oxygenated, VMAX delivers consistent power from launch to load-out.

Why Pros & Guides Choose VMAX AGM:

- ✓ Troll All Day: High amp-hour capacity keeps you moving for 8+ hours on the water without fading.
- ✓ Dual Purpose Power: The perfect balance of deep cycle capabilities for electronics and high cranking amps to start your engine.
- ✓ Maintenance-Free: Sealed AGM technology means no checking water levels, no corrosive fumes, and no hazardous leaks—even in rough water.
- ✓ Faster Recharge: Get back on the water sooner with faster recharge acceptance rates than traditional flooded batteries.
